Elevator Pitch

Hi, my name is Alexandre, how are you?

I'm a computer engineer and just graduated as (Full-Stack) Blockchain Developer at George Brown College here in Toronto, Canada.

I used to work with start-ups in the blockchain space in Brazil, and I'm trying to use those skills to leverage my solutions in the decentralized application industry.

I want an opportunity to be part of your company's team because I think blockchain will change the financial world (DeFi) as the Internet did with global information.

I've always been passionate about innovation and technology. I'm self-motivated and driven to accomplish big goals. Responsibility and challenges are like fuel for me.

Your company called my attention because of its culture and vision of the future. It seems a perfect match. What do you think about scheduling a meeting for this week to talk about how I could help you?
